CHANNELING MOM or Mom Coco Chanel

Queen Victoria described her 8th child Prince Leopold, as "the ugliest and least pleasing of the whole family". She frequently depicted him as grotesque in drawings and criticized his appearance. Out of all of her children, he arguably looked the most like her.

Professor Neyman –excited, holding stack of typed pages. “Read this immediately,” Neyman said. “I’m submitting it publication today. Dantzig stunned. His “homework” NOW a research paper. What he had copied from the blackboard NOT assignments at all, but 2 famous statistical conjectures resisting

Looking at the brown and tan braided like Easter-egg shaped trip-around the World. Grandma's fav quilt. We talk about all the countries to visit and the famous landmarks in each. She'd say. "You go n come home n tell me about it." And me stuck there tho I loved every second w grandma n grandpa, I just wanted to go with the rest of my family to all the fun stuff. Lawrence n pays wedding. Too little. Doug's friends' State Basketball Champ. You're Too little. Still convinced that's why they lost the Finals. Grandma n I refused to cheer for them. We no even watch. She agreed. I shoulda been able to go.

BUT THIS Sunday Morning Slssy n JoJo n DENNY mean rotten cousin Denny who

only got worse aft drafted to Vietnam War n lost his fiancée to a better man, are playing Monopoly. "I wanna play." Sissy JoJo n Denny, "Ur too little." ME: "Lemme play. U always say I'm too little for everything. I never get to do any of the fun stuff. I always have to stay st grandma's." THEM: "But u love grandma's house." "Yes but I also want to do the fun stuff w you guys." THEM "NO. YOU CANT PLAY."

ME: "We'll see about that." "GRANDMA, THEY WONT LET ME PLAY MONOPOLY with them." Grandma. "Don't make me come in there." Sissy, JoJo Denny: "But she doesn't know how to play." "SHE CAN ROLL DICE. TEACH HER." "NO WHY WE ALWAYS GOTTA TEACH HER?" "CUZ SHEs YOUR BABY SISTER. BE NICE TO HER. DO IT. DONT MAKE ME COME IN THERE."

So they reset the game. And we roll high dice to start. I got double sixes. But they made me roll again, wouldn't give me electricity. Then I roll 7. New York is mine. Yay! Orange. My fav colors. N the ones everyone lands on. Luck? Statistics.

Next turn 3 doubles...Railroad (ARE THESE ANY GOOD? I ask as they growl at me. "Lucky lil shit." That's what everyone always said when I beat them. And a green. N boardwalk. Now they pissed. ME: "GRANDMA. THEY BEING NAUTI." DON'T MAKE ME COME IN THERE.

and I got another Orange, Red and Park Place next round. They each only got 1 property and paid me 3 times.

But then they started to trade. "We'll teach u to trade." Well I liked purple and NOT

ROYAL BLUE. they made me feel guilty for having so many properties. I'd mortgaged some to buy the rest like they showed me. "But you love purple. You take Baltic n Mediterranean, we'll take Boardwalk n Park Place n give u 500 dollars you can unmortgage Orange." "OK."

Well they built hotels n I landed on Boardwalk again. THEM: "\$2000. WE WIN." ME. "HOW COME? GRANDMA." She comes in. I'm crying, "They cheated."

We're all talking same time. Grandma says, "That's Not Fair. No game. Start Over." And to me, "Next time call for doubles." ME: "I did I got 8 before they made it round the Board once."

GRANDMA: "Well then next time call me before u make a trade I'll double-check."

DID I B MENTION DENNY WAS like 18

prolly right b4 his NAM STONY n he came home meaner than that n ran his older brother outta town. Sissy 13 n JoJo 12? I'm 5.

Denny came over to me last summer next to the Mt Rushmore pile of gravel n his little one off to the side, "They just scrape some off to the side for me." He said. ME: "But its the county's gravel." He just smirked evilly. ME: "What did u do to chase Tim n wife n kids away? (His older Brother).

My oldest brother Dudley Do Right on the other hand the most beloved giy around, had the most unfortunate accident. He was electrocuted following heavy rain when i was 16. Mom never got over it. AND she wanted him to come to my Regional Track Meet that day. Instead he

went up to buy that lil BOBCAT near Beaulough. We qualified for State that day. DAM MILE RELAY. I hated that thing. 300s were my race. Won that on aa indoor meet. No matter how much I trained I always died rhe last 10-20 yards. Lungs just wouldn't cooperate. (WOW Imagine if I'd figured out my breathing thing back then, I prolly woulda set a 400 record. I was always way ahead until just before finish line when I'd just crash.) Anyway. Ugly times. N I pulled my hamstring. Even with coach taping it so I could still run, I lost a second. We got enuf for a ribbon, but NOT a medal. Just the week before I'd been showing duly my track prizes. It's all one big blur. But we lost the best part of our family that day, just 5 months aft losing Grandma, n 3.5 months aft losing Grandpa. Sissy's lil boy was born in between. The window God opens after closing a door.

He did bring joy to an otherwise v difficult spring. BUT that didn't last.

Anyway, last summer 2025 I'm driving out to the farm talking out loud to Grandma grandpa auntie my aunts n uncles about the problems with the gravel and park on my quarter at the home place where clearly they been min8ng gravel without paying me. Denny pulls up. "You don't wanna know [how I got rid of Tim]. I told him this ranch NOT BIG ENZUF for the both of us."

So aft Mom breathes her last gasp breath xmas eve morn... Just like me. IS IT ME? Did she return from the DEAD? Never made the PASS? HOW MANY LIVES? WHO BROUGHT ME BACK n Why?

Chapter 14. We NO BELIEVE in Chapter 13. Xcept for loser invading dics.

Perched at 8,700 feet (2,650 meters) on Cerro Pachón Chile, Rubin Observatory

exists to deliver exactly this: relentless, repeated scans that transform static night sky into living, evolving time-lapse of the cosmos. Universe is always constant flux. 1st time, humanity witnesses that change unfold near-real time. ⚡ It sounds like something from the future, but it's real. Scientists created a single particle of light that exists across 37 quantum info layers at once. With advanced entanglement methods, they linked photon's color and phase into one unified quantum structure. Think of it as tiny light-based data carriers that hold multiple info streams inside a single particle. This could lead to ultra-secure quantum comms and powerful next-generation computing. Expanded, it might change how we understand data, encryption, even hidden structure of reality.

Scientists revive a plant fr 32,000-year-old seeds found frozen in Siberian permafrost making this the oldest organism ever brought back to life. Researchers discover seeds of *Silene stenophylla* plant buried 124 feet beneath earth near Kolyma River. Tucked away inside an Ice Age squirrel's burrow, seeds were preserved at constant 19°F (-7°C). Deep freeze effectively prevented cellular decay since woolly mammoth era. Mature seeds were damaged, scientists were able to extract viable tissue from immature samples and placed them in a sterile growth medium. SUCCESSFUL REGENERATION lead to plants that flowered n produced their own fertile seeds, displaying subtle evolution

diff fr modern-day descendants.
